Zhonglin Liu

u3597461@connect.hku.hk

 Liu-Zhonglin (Joe)

EDUCATION

• **The University of Hong Kong**   *Sept 2022 - Aug 2026 (Expected)*

Bachelor of Science, major in Mathematics and Economics   Hong Kong SAR, China

  ◦ Young Scientist Scheme (YSS): An elite program offering early research training, mentorship, and international research opportunities for outstanding science students.

  ◦ Cumulative GPA: 3.88 / 4.3

• **National University of Singapore**   *Jan 2025 - May 2025*

HKU Worldwide Undergraduate Student Exchange Programme   Singapore

  ◦ Semester GPA: 4.9 / 5.0

RESEARCH INTERESTS

• Modelling of Complex Systems, Stochastic Models, Decision Making under Uncertainty, Applied Artificial Intelligence, Computational Biology.

RESEARCH EXPERIENCE

• **Analysis, Approximation, and Control of Probabilistic Boolean Networks (Ongoing)**   *2025 - Present*
Supervisor: Prof. Ching Wai Ki (HKU)
Systematically studied the analysis and control of PBNs for genetic systems, implementing matrix-based methods for both exact and approximate steady-state computation to ensure scalability. Formulated a finite-horizon optimal control problem with hard constraints to model realistic therapeutic interventions.

• **Mechanism Design for LLM Data Incentivization (Ongoing)**   *2025 - Present*
Supervisor: Prof. Hong Ming Tan & Prof. Jussi Keppo (NUS)
Examined LLM alignment through an economic lens, developing a mechanism to solve the free-rider problem in data generation by incentivizing users to signal their true quality under information asymmetry.

• **A PBN-RL-XAI Framework for Therapeutic Discovery in Melanoma**   *2025*
Independent Research
Developed an integrated PBN-RL-XAI framework to discover therapeutic strategies for immunotherapy-resistant melanoma, identifying a novel 'hit-and-run' inhibition therapy.   [⊕]

• **Inferring Progressive Disconnection in Alzheimer's Disease with PBNs**   *2025*
Supervisor: Prof. Zhang Louxin (NUS)
Developed a novel Probabilistic Boolean Network (PBN) framework to model effective connectivity in fMRI data, identifying a progressive disconnection of DMN-to-MTL pathways in Alzheimer's disease.   [⊕]

• **A Comparative Study of Algorithms for the Travelling Salesman Problem**   *2024 - 2025*
Supervisor: Prof. Zang Wenan (HKU)
Compared classical heuristics against hybrid reinforcement learning models for the Euclidean TSP, demonstrating that an Actor-Critic agent integrated with classical methods achieves competitive performance.   [○]

• **Machine Learning Methods in Prediction of Online Portfolio Selection Problems**   *2023 - 2024*
Supervisor: Prof. Ching Wai Ki (HKU)
This project investigated the integration of machine learning models, specifically LSTM and XGBoost, to predict asset prices for Online Portfolio Selection strategies.   [⊕]

PUBLICATIONS AND MANUSCRIPTS

WORK/PROJECT EXPERIENCE

- **Enhancing Mathematical Understanding via Manim [🌐] [⭘]** *2022 - Present*
Team Leader & Main Producer Hong Kong
  - Utilized Manim to create animated educational videos illustrating mathematical concepts. In charge of managing workflows and distributing tasks.
  - Served as the main producer for videos that were broadcast across the HKU campus via U-Vision, enhancing mathematical understanding for the university community. Example of my work: Maths in a minute – 2025 - A very mathematical year.

- **Bank of China** *August 2024*
Credit Analyst Intern China
  - Analyzed industry credit reports and prepared detailed financial summaries to support client credit evaluations.

- **Department of Mathematics, The University of Hong Kong** *Oct 2023 - Dec 2023; Feb 2024 - May 2024*
Student Teaching Assistant Hong Kong
  - Assisted in teaching fundamental concepts of mathematics and multivariable calculus, conducting revision classes to improve student performance.
  - Developed video tutorials using Manim to visually simplify and explain complex mathematical concepts.

- **Essence Brilliant Limited** *August 2023*
Education Content Developer Hong Kong
  - Created dynamic educational videos using Python and Manim to explain complex topics.
  - Managed team task distribution and facilitated communication between internal and external stakeholders.

HONORS AND AWARDS

- **Undergraduate Research Fellowship Programme with Research Internship Awards** *2025 - 2026*
The University of Hong Kong [🌐]
- **Wong Yung Chow Prize in Mathematics** *2024 - 2025*
The University of Hong Kong [🌐]
  - Awarded to the best 3rd year student in Mathematics, on the recommendation of the Head of Mathematics.

- **Hong Kong Chiu Chow Chamber of Commerce Rayson Huang Memorial Student Enrichment Award** *2024 - 2025*
The University of Hong Kong [🌐]
- **HKU Recognition Award for Distinguished Service to the Community** *2024 - 2025*
The University of Hong Kong [🌐]
  - Awarded for the "Enhancing Mathematical Understanding: A Students as Partners (SAP) Project in Animation and Engagement" group project, which enhanced mathematical understanding through animated videos made using Manim.

- **C.V. Starr Scholarships** *2024 - 2025*
The University of Hong Kong [🌐]
- **Summer Research Fellowship** *2023 - 2024*
The University of Hong Kong [🌐]
- **Dean's Honours List** *2022 - 2023, 2023 - 2024, 2024 - 2025*
The University of Hong Kong

EXTRACURRICULAR

- **Lead for Life Character Leadership Programme (Team Courage)** *2022 - 2025*
The University of Hong Kong [🌐]
  - A multi-year programme focused on character leadership, mentorship, and service-learning. Participated in workshops on resilience and mindset, and completed a service project with the Mission for Migrant Workers.

- **Volunteer** *2023 - Present*
Mission for Migrant Workers (MFMW) [🌐]
  - Organized and supported community events, including charity raffles and the provision of free health services for migrant workers.

ADDITIONAL INFORMATION

Languages: Native Mandarin; Fluent English (TOEFL: 112/120)
Hobbies: Teaching, Photography
